

- Nominee name

Brady Precord

- Nominee year of graduation

2027

- How many years the student has participated in FIRST

3 years FRC

1. Explain how the student embodies the philosophies of Gracious Professionalism® and Coopertition® through the FIRST Core Values: Discovery, Innovation, Impact, Inclusion, Teamwork and Fun. Please provide examples. 793 out of 800

As a 2nd generation participant, Brady Precord uses the word legacy to describe being a part of *FIRST*. He demonstrates what being all in on *FIRST* looks like by being an inclusive, teamwork-focused team member all while showing the core values in action. Continually, he looks for ways to improve himself and Team 1091. Beginning in 2024, he initiated the team website overhaul to improve communication and conceived Robo Ozzy's Crew. The Crew brings team members together to use our mascot to increase fun interactions with other teams and the community. Since joining, he has volunteered at **85%** of Team 1091's outreach events and worked as a junior mentor with 2 FLL teams each season. He dedicates time every month providing STEM education to our community and sharing the *FIRST* experience.

2. How has the student increased the awareness of FIRST? Describe the student's interests and/or plans to continue to engage with FIRST beyond high school. Please provide examples. 752 out of 800

Brady is one of our go-to upfront promoters of *FIRST*, Team 1091, and STEM outreach. His involvement with *FIRST* includes participation in both FLL and FRC. Brady's knowledge of both levels has proven invaluable when speaking to a wide range of community members. Since Spring 2024, he has dedicated **308 hours** volunteering, leading, and mentoring at Team 1091's STEM camps, STEM/robot expo events, and LEGO Challenge events; as well as FLL meetings and competitions. Since joining, he has attended **44 out of 52** team outreach events. Brady's investment in Team 1091's outreach is on a level like no other on

the team. In the future, he hopes to attend UW-Madison and volunteer with Badger Bots; as well as continue to support Team 1091 in any way he can.

3. How does the student's individual contribution to the team benefit the team as a whole? Please provide examples. 797 out of 800

Brady started as a programmer, but his greatest team contributions lay elsewhere. He often brings ideas to the team that solve problems, add fun, or increase awareness. One idea was his Robo Ozzy's Crew idea. Originally, our mascot just walked around. Brady brought team members together to give him a personality & lore. His ideas focused on connecting with fellow teams & the community through our mascot while having fun. At 2024 competitions and events, he used Robo Ozzy to hype fellow teams heading to the field, to engage with kids through dance-offs, and other activities. In year 2, he looked for & implemented ways to improve mascot safety, which were included as part of our first mascot safety guide to improve team safety. Fun, Teamwork, and Impact are the core of his Robo Ozzy Crew.

4. Describe the student's experience in and mastery of areas of STEM. This could include, but is not limited to, skills in engineering, software, CAD, fabrication, etc. Please provide examples. 712 out of 800

Brady's skills and experience are in computer programming and website development using Python, Java, HTML, JavaScript, and C++.

As a part of the programming team, he has coded the robot and assisted in the website redesign using Java, HTML, JavaScript, and C++. Brady contributed to the website design by creating approximately 65% of the content and using HTML to produce sections of the sponsor page.

He also uses his programming knowledge to introduce 10–14-year-olds to programming languages at the team's STEM camp. In 2025, he took lead on a third of the Programming Camp planning and instruction. Currently, Brady is using his programming skills to develop and implement a new youth programming workshop.

5. Explain the student's leadership to their fellow team members and/or others in the community. How do they motivate others? What is their leadership style? Please provide examples. 791 out of 800

Brady's leadership style aligns with the democratic style. As the Team 1091 2025-26 Project Manager and Safety Coordinator, he encourages team input and collaborations to make decisions and coordinate tasks. He also knows his team, so he uses the power of rewards to motivate others too. His food rewards, that occasionally include items he bakes, refuel teammates after goals are reached.

In his FLL Junior Mentor role to 2 teams, he uses both food rewards, like cheese curds, and other fun, out-of-the-box rewards to inspire members to push towards their goals. He even **dyed his hair purple** when FLL team, Athletic Technics, reached their goal of competing at the state UNEARTHED season competition. Overall, Brady is a task-orientated leader who also believes in having fun along the way.

Additionally, there is a 500-character limit prompt for sharing additional information about the student:

6. Please share anything else you'd like us to know about the student, including academic performance, specialized skills, technical expertise, or additional extracurricular activities. 473 out of 500

Team 1091's lead advisor stated that Brady bleeds Robotics. His fellow team members say he is all *FIRST* robotics and call him Mr. Team 1091. Brady even turned his car into a motorized team advertisement; with a large Team 1091 graphic across the hood, a logo on the back window, and orange detailing. Outside of Robotics, Brady is a member of National Honor Society (1 yr), the school swim team (1 yr), and works at the YMCA (6 mos).
